PROFESSIONAL SUMMARY

Data Analyst and Business Analyst with 2 internships and 4 end-to-end analytics projects. Skilled in Python (Pandas, NumPy), SQL, Power BI, EDA, and statistical analysis. Experienced in translating complex datasets into stakeholder-ready insights and dashboards. IIT Roorkee graduate with a strong foundation in quantitative methods and Agile delivery environments.

EDUCATION

B.Tech. - Biosciences & Bioengineering	6.69 CGPA
Indian Institute of Technology, Roorkee	2022 – 2026
Relevant coursework: Probability & Statistics · Data Structures · Machine Learning · Database Management	
Intermediate (Class XII)	98.60%
Sri Chaitanya Junior Kalasala, Telangana (SSC)	2022
Matriculate (Class X)	10.0 CGPA
Paramita Heritage School, Telangana (SSC)	2020

INTERNSHIPS

Business Analyst Intern · TEMS Tech Solutions	Feb 2025 – May 2025
- Improved lead prioritization accuracy by 30% as measured by sales team conversion feedback by building a client and competitor tracker using Python and structured data pipelines, enabling evidence-based stakeholder presentations. - Reduced competitor research turnaround by 40% by automating market trend analysis and consolidating outputs into a dynamic Power BI dashboard for pricing and positioning decisions, delivered within Agile sprint cycles. - Surfaced 3 high-potential market segments by conducting EDA on 10,000+ prospect records and presenting findings to senior leadership across weekly stakeholder review sessions. - Streamlined requirement gathering across 4 cross-functional teams, cutting revision cycles by 25% by translating business needs into structured analytical reports aligned with Scrum sprints.	
Data Analyst Intern · Technocolabs Softwares Inc.	Jun 2025 – Aug 2025
- Increased insight delivery speed by 35% across 3 client projects by cleaning and aggregating 50,000+ rows of structured sales data using Python and SQL, reducing data errors by 20%. - Identified 4 loss-making product segments contributing to 18% revenue leakage through deep EDA on discount, profit, and customer behavior data, visualised in Power BI dashboards. - Designed interactive dashboards segmented by region, category, and time period, enabling A/B analysis of discount strategies and directly informing 3 pricing decisions. - Translated statistical analysis findings into business-ready reports adopted by non-technical stakeholders, reducing follow-up clarification requests by 30%.	

PROJECTS

Customer Churn & Revenue Leakage Analysis - Telecom	Dec 2025 – Jan 2026
Kaggle	
- Quantified \$2.3M+ in simulated annual revenue leakage by analysing churn patterns across 7,000+ telecom customers using Python and SQL. - Identified top 3 churn drivers (contract type, tenure <12 months, high CLTV customers) using logistic regression and feature importance analysis with Scikit-learn. - Built a retention scoring model achieving 82% precision, enabling segment-level intervention strategies to reduce projected churn by 18%.	
Tools: Python, SQL, Scikit-learn, EDA, Churn Modelling	

Sales & Profit Analysis in Retail

Oct – Nov 2025

Kaggle

- Uncovered 22% profit drag from over-discounting in the Furniture category by analysing 9,994 transactions across 4 regions using Python EDA and statistical analysis.
- Identified the West region as the top revenue driver (+34% vs average) and the Central region as the most loss-exposed, supporting targeted pricing recommendations.
- Built automated monthly trend visualisations revealing Q4 seasonality spikes, informing inventory planning logic for 3 product sub-categories.

Tools: Python, Pandas, Matplotlib, Power BI, Statistical Analysis

Boosting Revenue in Urban Food Courts

Jun 2025

Self-initiated

- Diagnosed a <12% visitor-to-customer conversion rate in Tier-2 city food courts using funnel analysis, issue trees, and 5 customer personas.
- Prioritised 5 low-cost interventions via RICE framework, projecting a 25% conversion uplift within a 60-day rollout validated against secondary market research.

Tools: Funnel Analysis, RICE Framework, Business Strategy, User Personas

SKILLS

Languages	Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, DAX
Analytics	EDA, Statistical Analysis, A/B Testing, Predictive Modelling, Data Cleaning & Preprocessing
Visualisation	Power BI, Tableau (basic), Matplotlib, Seaborn
ML	Scikit-learn, Logistic Regression, Decision Trees, Feature Engineering
Tools	Jupyter Notebook, VS Code, Kaggle, Git, Jira (basic)
Workflow	Agile / Scrum, Stakeholder Reporting, Requirement Gathering

AWARDS & ACHIEVEMENTS

-
- JEE-Advanced 2022 - Rank 7,379 among 1.5 million candidates (top 0.5% nationally)
 - Reliance Foundation Scholarship merit-based national award, May 2023
 - NCC 'B' Certificate with Grade A distinction leadership and discipline track, IIT Roorkee

POSITIONS OF RESPONSIBILITY

Co-opted Member · Cognizance, IIT Roorkee (Tech Fest)

Dec 2022 – Mar 2024

- Created a new revenue stream via 'One Pass All Workshops' model, onboarding 20+ companies and driving 1,000+ paid participations in Cognizance '24.
- Achieved 300% growth in workshop participation for the Free Online Workshop Series in Cognizance '23 by redesigning outreach and registration flow.

Associate Coordinator · Placement & Internship Cell, IIT Roorkee

May 2023 – Apr 2024

- Managed end-to-end company relations for 50+ recruiters, coordinating interview schedules and recruiter communications contributing to a 95% placement rate for the 2023 graduating class.
